What Our Clients Say

Don't take our word for it. Here's what business owners across Bahrain and the GCC say about working with AM Group.

“

Working with AM Consulting was a genuine turning point for our business. They went deep on our strategy, identified what wasn't working, and helped us rebuild with a clear growth path. Customer engagement and profitability have both improved significantly since we started working together.

—
9 Origins Coffee
CHIEF EXECUTIVE OFFICER

“

AM Accounting gave us the financial structure we didn't know we needed. They set up our reporting systems, handled our VAT compliance, and gave us complete confidence in our numbers. Professional, proactive, and always available when we need them.

—
All Care Pet Clinic
MARKETING DIRECTOR

“

We've been with AM Accounting for years and the consistency is remarkable. Our books are always in order, compliance is handled without stress, and they even guided us through the Tamkeen process. For any clinic or SME looking for reliable financial expertise — look no further.

20+ YEARS OF EXCELLENCE

This is wrong – company started in 2016, 10 years

ABOUT US —

Driven by *Excellence*

AM Group is a multidisciplinary firm bringing together **Consulting, Advisory, Accounting, Design, Social Media Management, and Data Analytics** under one trusted name. Founded with a vision to empower businesses across the GCC, we provide integrated solutions for today's complex challenges.

Whether guiding a startup, supporting an established enterprise, or enabling expansion into new markets — we stand by our clients every step of the way with a commitment to creating true value.

Our Mission

To deliver tailored consulting, design, accounting and technical solutions that foster sustainable growth, operational efficiency, and market relevance for businesses across the Gulf region.

Our Vision

To be the leading consultancy in Bahrain, Saudi Arabia, Oman, and UAE, empowering businesses with strategy, creative design, and financial expertise while upholding innovation, integrity and excellence.

MESSAGE FROM THE CEO

Leading with Vision, Growing with Purpose

For over **25 years**, I've witnessed the MENA region's dynamic growth. In 2016, inspired by my father's entrepreneurial spirit, I founded **AM Group**—uniting Consulting, Design, and Accounting under one trusted name.

At AM, we know every business faces unique challenges. That's why our multidisciplinary team combines strategy, creativity, and financial expertise to help clients grow, build strong brands, and achieve lasting success.

What sets us apart is our philosophy: we build **partnerships, not transactions**—focusing on open communication, collaboration, and long-term impact.

Today, across Bahrain, Saudi Arabia, Oman, and UAE, our mission remains clear: to deliver integrated solutions that inspire transformation, drive innovation, and empower businesses for a brighter future.

Accurate, Reliable, and Defensible Valuations

Business valuation is the process of assessing the economic value of a business and is often required for strategic decision-making.

Organizations may need a valuation when considering a sale or acquisition, resolving legal disputes, facilitating partner exits, or restructuring capital. It also helps business owners gain a clear understanding of their company's worth.

Our services follow a structured and rigorous approach, analyzing internal financial data, industry benchmarks, and market intelligence to deliver results aligned with international best practices.

Quality and Depth for Successful Acquisitions

The success of any acquisition depends largely on the quality and depth of due diligence. At AM Consulting, we provide comprehensive services from both buy-side and sell-side perspectives.

Our approach enables informed decision-making through a thorough assessment of the target company's assets, liabilities, financial position, and overall performance.

Each engagement is tailored to the client's specific objectives to help maximize value and mitigate risk throughout the transaction lifecycle.

🔍 FAQ —

Frequently Asked Questions

What does financial advisory cover?

How can financial advisory improve business performance?

Do you only work with large companies?

How do you ensure confidentiality of financial data?

Qs about advisory coming under ESG, not correct

Economic Substance Regulations (ESR)

In Bahrain, all businesses registered with a Commercial Registration (CR) are required to comply with ESR. These regulations ensure that entities demonstrate substantial economic presence and operations within Bahrain.

Failure to meet these requirements may result in severe penalties, including fines, suspension of commercial registration, or criminal prosecution.

Core Income-Generating Activities (CIGA)

Your Trusted Partner for Financial Integrity

In today's dynamic regulatory environment, maintaining compliance with financial regulations is essential. AM Consulting serves as your trusted partner for Anti-Money Laundering (AML) and Counter-Financing of Terrorism (CFT) compliance.

We provide organizations with tailored solutions, including risk assessments, policy development, and implementation of robust controls.

Our proactive approach ensures that your business not only meets current regulatory requirements but is also prepared for future legislative changes.

How Is an Accounting Backlog Completed?

AM Accounting Services understands that, at times, businesses may be unable to maintain proper books of accounts or financial reports over extended periods. This can create challenges and hinder business progress. Maintaining accurate and up-to-date accounting records is a fundamental requirement for the smooth execution of business operations.

Our experienced accountants assist businesses in catching up on accounting backlogs by updating, preparing, and reconciling outstanding accounts. We work systematically to restore accurate financial records, ensure compliance, and provide clarity for informed decision-making.

updating, preparing, and reconciling outstanding accounts. We work systematically to restore accurate financial records, ensure compliance, and provide clarity for informed decision-making.

Our Backlog Accounting Services Include

01.

Review of Past Transactions

We perform a thorough review of your past financial transactions, including income, expenses, sales, and purchases, to ensure that everything is accurately documented. This review allows us to identify any gaps or discrepancies in your financial records.

02.

Reconstruction of Financial Statements

For businesses with incomplete or missing financial data, we assist in the reconstruction of financial statements. We compile all available information to create accurate balance sheets, income statements, and cash flow statements for the relevant periods.

Gap is too much

Wherever it's written AM Accounting service change to just AM Accounting

VAT Advisory

- ✓ Recommendations on transaction structuring to optimize VAT costs
- ✓ Review of business documentation to assess VAT implications
- ✓ Advice on VAT-related issues and queries

VAT Compliance

- ✓ Review of VAT-related documents, reports, and reconciliations
- ✓ Assistance with VAT registration with the National Bureau of Revenue (NBR), Bahrain
- ✓ Assistance with VAT deregistration for business closure
- ✓ Preparation and filing of VAT returns

VAT Training & Refund Assistance

We provide VAT training to client teams to build internal capacity for handling VAT compliance and related matters effectively.

- ✓ Review of transactions and eligibility for VAT refunds
- ✓ Review of invoices to ensure VAT compliance
- ✓ Preparation and documentation of refund applications
- ✓ Coordination with authorities to support refund processing

VAT Audits & Representation

As a registered VAT Agent in Bahrain, we represent taxpayers before the National Bureau of Revenue and assist with:

- ✓ Preparation of documentation related to penalties or fines
- ✓ Liaison with authorities during VAT audits
- ✓ Filing appeals and resolving VAT-related issues
- ✓ Support in VAT litigation and dispute resolution

- ◆ Campaigns & Paid Promotions

Our Approach

We combine design, content strategy, and performance insights to grow your brand organically and through paid campaigns.

On all pages put our approach on left and what we do on right

Compliance & Regulatory

Regulatory Risk Management

Regulatory risk management involves the preparation and implementation of robust compliance and AML policies and procedures, supported by appropriate software solutions for compliance, AML, and sanctions monitoring. It also includes ensuring adherence to data privacy laws such as GDPR and PDPL, along with regular compliance and AML training for relevant stakeholders.

The framework further supports the implementation of new and evolving regulations and ensures timely, accurate regulatory compliance reporting to maintain transparency and regulatory alignment.

Regulatory Risk Assurance

Regulatory risk assurance provides independent and structured assurance over the effectiveness of regulatory compliance across the organization, including AML, KYC, and sanctions risk management practices. It also covers data privacy and vendor risk assurance to ensure third-party and information protection risks are adequately managed.

In addition, the framework supports external assessments of the Operational Risk Management (ORM) framework and Liquidity Risk Management (LRM) framework, as required by the Central Bank of Bahrain (CBB), to ensure continued regulatory compliance and best-practice alignment.

This looks very cluttered

Create Insight, Impact & Innovation for Financial Services

The promise of Big Data and analytics for CFOs is addressed in scrubbing financial transactions which are aligned to cleanly capture and benefit from more advanced analysis to finding oddities and patterns.

For example, although individual payment transactions may each appear appropriate, advanced analytics can help identify areas that may represent fraud, which can then be investigated further. Similarly, credit risk can be better predicted by looking at large amounts of data and more efficient analysis tools that can help audit more transactions and even utilize unstructured data to identify potential outliers.

The Outsourcing Advantage

Like many other advocates for financial analytics, experts say you don't have to bring analytics expertise in-house, with all its hiring and training pressures.

That's where the outsourcing services segment steps in. An outside firm that also has a strong history as a system integrator can provide the integration and analytics, which ERP systems often lack, especially on the financial side.

SSPL offers both. The solutions and services are well designed for the clients that cater into delivering the best optimized and customized proposals.

Even this looks cluttered
